WE TRANSFORM DATA INTO A NUTRIENT

Rationalizing the use of resources in agriculture is the ambition that drives us at AgriEdge. We transform data into decision-making proposals for the farmer in order to maximize his yield.

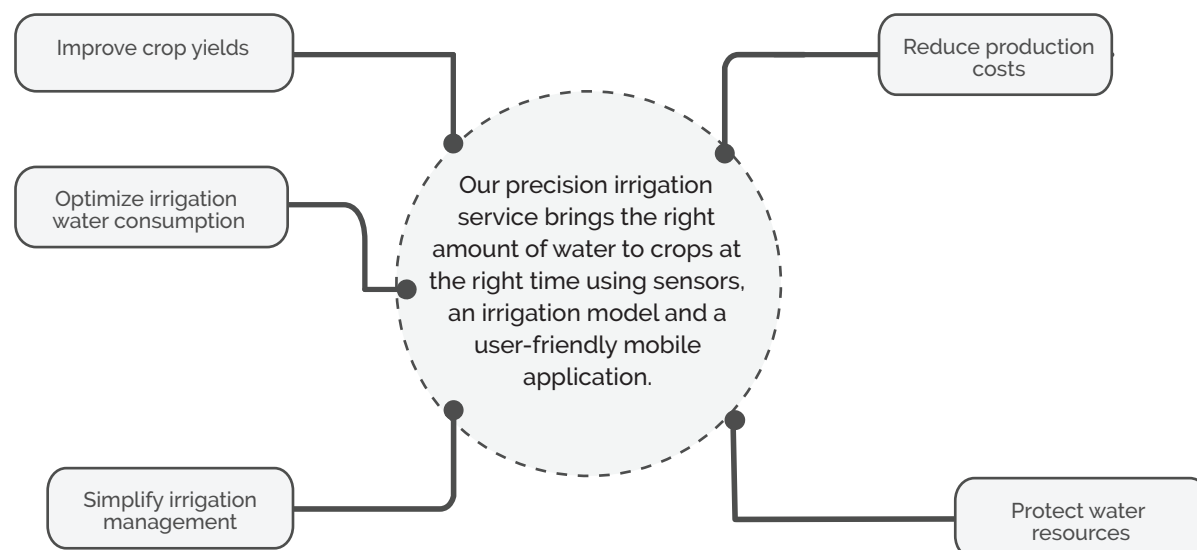

WE RELY ON RESEARCH AND DEVELOPMENT

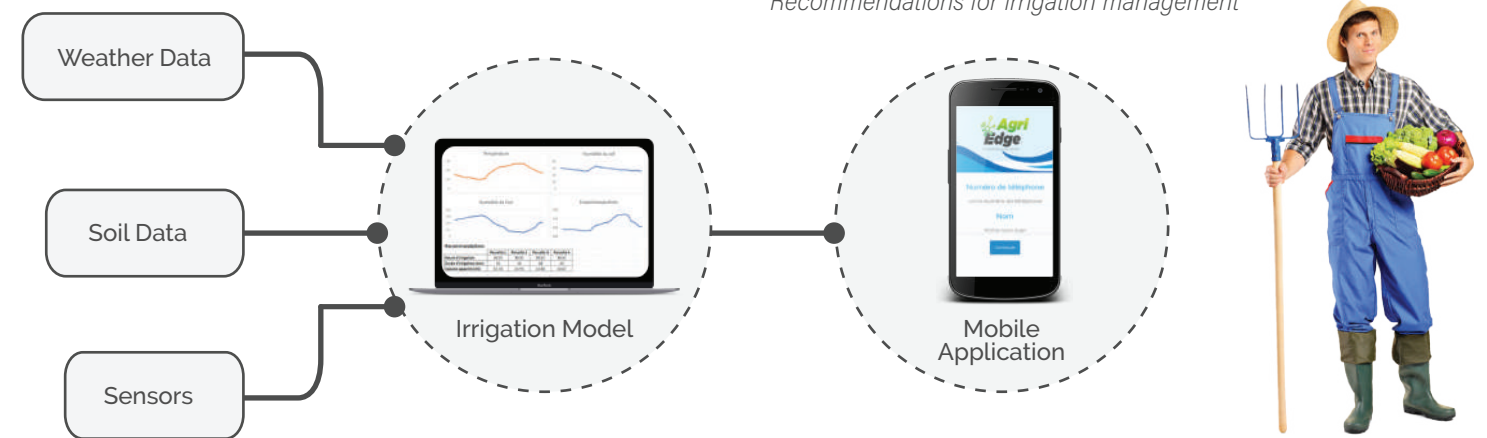

Our approach is focused on research and development in order to **promote sustainable agriculture**. We work closely with an international scientific community composed of recognized experts in the field of precision agriculture.

These experts lead the annual **Agri Analytics Days**, AgriEdge's scientific platform.

IOT FOR PRECISION IRRIGATION

Recommendations for irrigation management

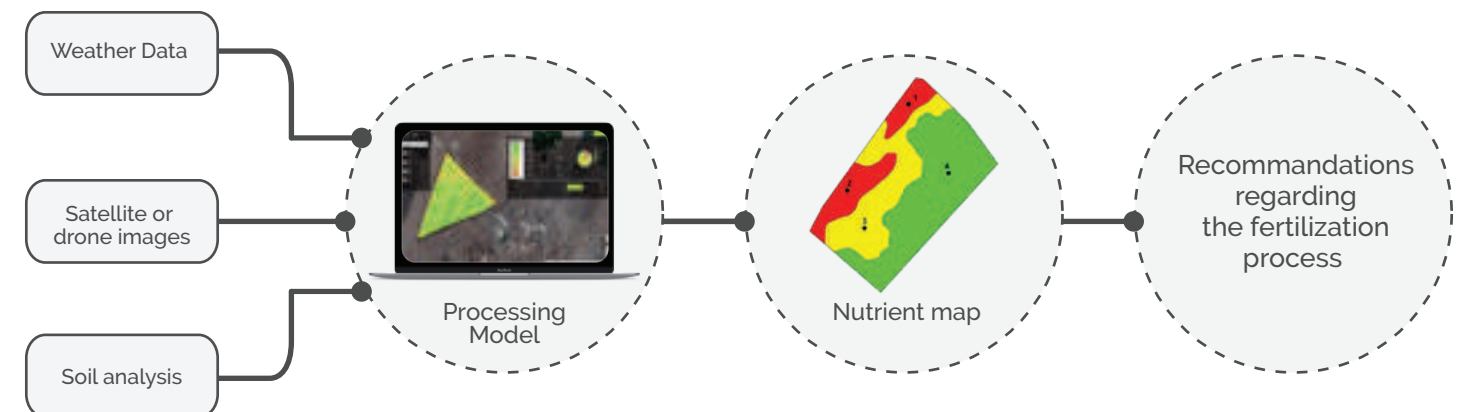

Abdelghani's testimony, a farmer in Rhamna region.

« The implementation of AgriEdge's Precision Irrigation service has allowed me to **reduce my water consumption by 15%**. »

SATELLITE IMAGES AND DRONES FOR A REASONED FERTILIZATION PROCESS

This service allows the farmer to manage his **fertilization** in an efficient way by knowing where, when and how much fertilizer to apply in order to achieve optimal yield while minimizing the cost.

PHYTOSANITARY DIAGNOSIS USING YOUR MOBILE PHONE

« **Phytodetect** » allows farmers to identify the diseases and pests infecting their crops by taking simple photos on their phones, and to quickly access information on the **appropriate corrective and preventive methods** to use.

In addition, The app sends alerts on potential diseases to allow the farmer to implement preventive measures.
